

**E-TECH BOATS**  
ECO-FRIENDLY TECHNOLOGY

## ***Flying Shark***

**Flying Shark 5.7 combines classic design and modern technical solutions. Our boats are made of certified materials from renowned manufacturers, enriched with decorative elements made - among others - of Burmese teak and carbon fiber.**

Each deck version of Flying Shark 5.7 can be fitted with either gasoline or electric propulsion. Thanks to the cooperation with Torqeedo GmbH, the boats are ready for installation of Cruise and Deepblue systems.

There are three deck versions available - Flying Shark, Bowrider and Capri. Each of them can be easily adapted to the customers' needs. Each boat can be equipped with a number of additional features, i.e. compressor cooler, shower or water-ski post.

The Flying Shark 5.7 line is distinguished by its unique design, high quality of finish and attention to details. All our boats are certified in the Polish Register of Shipping and their designs are registered in EUIPO.

## Flying Shark 5.7
